## What's In The Box

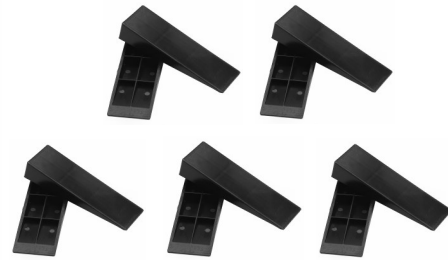

Please inspect the contents of your shipped package to ensure you have received everything that is listed below.

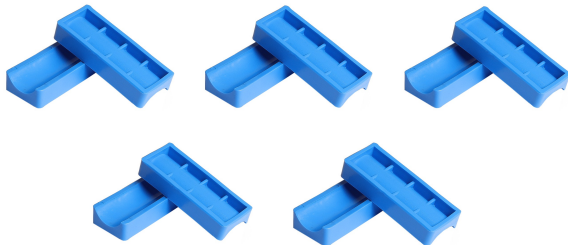

4ft Long Aluminum Track (6 Set)

2 x Track Stoppers

10 x Black Wedges

10 x Blue Wedges

6 x Track Connectors

1 x L-Type Allen Key  
(Size: 4mm)

Bag Packing

## ■ 12ft Straight Aluminum Track Setup

- Pull the cap to detach it from the 4ft track rail.

- Slide the track connector into the 4ft rail, ensuring a secure fit.

**Note:** The Track comes in 4 feet sections, which are easy & quick to assemble/disassemble. The compact version also minimizes the space required for transport and storage.

- Align the threads properly and tighten the screw with an Allen key.

**Note:** Slide an extension section (Track Connector) onto each end to complete a 12-foot run. Then, install and secure them properly.

### Precise Track-to-Track Transitions

For Smooth Bump-less Rides

- Follow the same process by aligning the threads first. Once properly aligned, tighten the screws firmly to ensure a secure and stable connection.

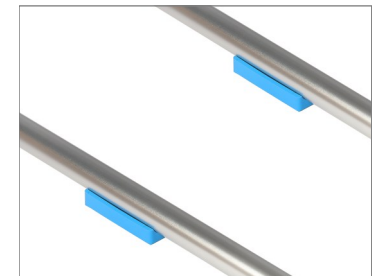

- Push the track rail onto the track connector firmly to stabilize it.

- Secure the second track rail in the same way by pushing it into place as shown in the image.

- Attach the blue wedges under the track for its rigidity and to prevent your dolly from running off the rails.
- Repeat the same process on the other side.

- Attach the Black wedges under the track for its rigidity and to prevent your dolly from running off the rails.
- Follow the same process on the other side.

- Now, track is ready and place dolly **(Not Included)** on the tracks as shown in the picture.
