## Mitchell Tripod Stand with Spreader Setup

- Place the spreader on the floor. Open the legs to your required width using the provided knob.

- Position the Mitchell Tripod Stand onto the spreader. Secure it firmly using the rubber grips.

- Spread the mid-level spreader according to your setup requirements. Ensure all three bottom adjustment knobs are tightened properly to secure the tripod.

- Set the height of the Mitchell Tripod Stand by loosening all three adjustment knobs, sliding the tripod to the desired height, and then tightening the knobs securely.

- Remove the fluid head (**Not Included**) by loosening the Castle ring, then mount it securely onto the top of the Mitchell Tripod Stand.

- After mounting the fluid head on the Mitchell Tripod Stand, tighten the Castle ring from the bottom, as shown in the image.

- Remove the fluid head top plate by pressing the push pin on the fluid head, then attach the plate to the bottom of the camera (**Not Included**), matching the camera thread.

- After attaching the fluid head plate, securely tighten it with a screwdriver. Then slide your camera onto the fluid head.

- Secure the camera using the locking knob on the fluid head.

- The setup is now ready for use.  
**Note:** The assembly process remains the same for both P-MTCL-STD and P-MTCL-STD-BLK models. The only difference is the color (Silver and Black).
